

CDM Solutions for LDCs

Rodan Energy develops Conservation and Demand Management as well as Green Energy plans for Ontario's LDCs. We offer a range of advisory and program delivery services.

CDM Plan Development

- Review the CDM Objectives of your LDC
- Research CDM Programs - Determine Annual Targets & Maximize Margins from Funding Models to Finalize your CDM Target
- Develop a high level four-year plan, broken down to a year by year plan including annual milestones for achieving CDM targets with Tier 1, 2 and 3 programs
- Conservation delivery trends and new technology review
- Economic analysis of potential Tier 2 and 3 programs including Total Resource Cost Test and Program Administration Cost Test
- Measurement and Verification for each program
- Business strategy for each market opportunity, program and customer sector
- Preparation and submission of final CDM Plan to the OEB
